**PRESS RELEASE**

Advent has purchased additional MEA manufacturing equipment to increase production capacity. Dr. Nikolaos Triantafyllopoulos, Production Manager, says “this additional press is designed for large format MEAs, which strengthens our ability to produce MEAs for the electrochemical hydrogen separation market, as well as for micro combined heat and power systems 5 kW or larger”. Our current MEA production capacity is 3,200 units of standard MEAs at 45cm<sup>2</sup> per month.

*Advent Technologies is a world leader in the development of new materials and systems for energy applications. Advent Technologies is headquartered in Cambridge, MA, USA. The company also occupies research and development space in Patras, Greece where pilot manufacturing is taking place.*
