

PRESS RELEASE**April 16 th, 2014****Prime Minister of Greece, Antonis Samaras, visits Advent's Technologies Laboratories in Patras.**

Prime minister of Greece Mr. Antonis Samaras visited the laboratories of Advent Technologies SA in Patras Science Park in Patras, Greece. During his visit, the Prime Minister had a tour of the lab facilities where the pilot production was described and he was informed in depth about the innovative technologies developed by Advent Technologies. The company is a world leader in the development of new materials and systems for energy applications. Advent exports 100% of tis products with customers in American, European and Asian markets. Specifically, Advent Technologies' main product is the high temperature membrane-electrode-assemblies (HT MEAs) which is the core part of systems that convert hydrocarbons into electricity. In addition, the Company possesses world class technology in the area of materials for organic photovoltaic applications (OPVs) and organic optoelectronic materials in general.

Dr. N. Triantafyllopoulos with the Prime Minister

'We are optimistic that Advent Technologies will become a world-class player in the sector it competes with continuously increasing revenue. Our presence both in Europe and in the USA along with the recent license agreement for the manufacturing of complementary products from the German chemical company BASF in Advent facilities contributes to our optimism" said Dr. Vasilis Gregoriou, one of the cofounders of the company, now the President of the National Hellenic Research Foundation (NHRF) in Athens Greece.
