

June 2015

PRESS RELEASE

Negotiations of Advent's \$1.25M Department of Energy contract conclude. Advent was awarded this grant under an incubator program, whereby the utility of using high temperature MEAs to directly produce electricity from environmental diesel (dimethyl ether) will be demonstrated. Los Alamos National Laboratories, a pioneer in fuel cell technology, is a partner on the effort.

Advent Technologies is a world leader in the development of new materials and systems for energy applications. Advent Technologies is headquartered in Cambridge, MA, USA. The company also occupies research and development space in Patras, Greece where pilot manufacturing is taking place.
